

CERTIFICATE OF COMPLIANCE

We certify that our products labeled as RELY VALVES AND STRAINERS, are manufactured as required using different standards for different countries.

In the case of CHILE and some South American countries the standard is DIN.

In the case of USA and most other countries in Central and South America the standard is ANSI.

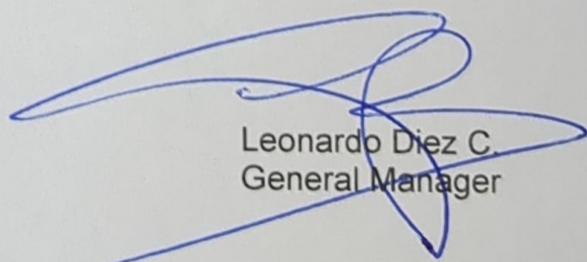

In the case of Australia and New Zealand the standard is CLASS D.

Therefore, the RELY VALVES AND STRAINERS distributed by our Branch, TERMOPRO HDPE CORP. are all in compliance with the ANSI standards, as far as the dimensions of flanges and connections.

With reference to the Pressure ratings all products in all diameters are rated for 150 PSI, or CLASS 10.

With reference to materials used, body and HDPE parts are manufactured with PE 100 (or PE3408) and the metal parts (bolts, nuts, washers, pins, clips, cleats) are made with SS316. The springs are made with SS304.
