The difference MOLDED Makes

Integrity Fusion continues to be the market leader in electrofusion fittings, by offering innovative solutions to all of your fusible needs. Our IntegriFuse brand EF Equal Tees are molded in sizes up through 8" IPS and fully pressure rated to SDR 11. The EF Tees are manufactured with electrofusion outlets on the mainline, and butt fusion on the outlet, allowing the installer several options when connecting the lateral line. Electrofusion Tees offer a convenient alternative to traditional butt fusion when dealing with tight spaces, repairs, vertical applications, or any project when difficult to utilize butt fusion equipment.

IntegriFuse EF Fittings are manufactured from the highest quality black high density bimodal polyethylene copolymer resin designed for use in, but not limited to, potable water, natural gas, industrial, landfill, oil & gas, and mining applications.

All IntegriFuse fittings meet ASTM –D2513 & ASTM D3261 (where applicable)
